

Online Library – Education Resources

All students studying for a University of Wales qualification at a collaborative centre can take advantage of the Online Library. This web-based library service provides students with supplementary resources to those offered by the library service at a collaborative centre. It is continually being developed, with more subject areas and new resources being added and as part of our Global Campus website, the Online Library can be accessed 24 hours a day, from anywhere in the world.

Psychology And Behavioral Sciences Collection

This database has relevance to education students. It offers nearly **400 full text journals** on emotional and behavioural characteristics, psychiatry and psychology, mental processes, anthropology, and observational and experimental methods. Students can change the language of the user interface for this database.

eJournals

The Library has an **A to Z List of eJournals** which students can search to find a journal in our collection. It includes all journals that we subscribe to plus many open access journals.

eBooks

Our ebooks collection offers additional books to the core books recommended by a collaborative centre. It currently contains **over 700 ebooks** for all our subjects, and over 3,000 out of copyright ebooks.

Study Skills

There is a dedicated section to show students **how to reference, avoid plagiarism, find theses and dissertations**, and it offers a list of available **study skills ebooks** from our ebook collection.

Other Websites

We recommend free websites to help students find additional information.
